

# Alberta Police Recruit Selection Standards

## **SUPPLEMENTAL VISION REPORT – FORMS**

For Police Constable Applicants

*Alberta Solicitor General and Public Security*

*Alberta*

<p><b>Police Recruit Selection Standards</b></p> <p><b>Corneal Refractive Surgery Summary for all Candidates</b></p> <p>Night Vision Testing is also required. See Appendix 1 of the Guidelines for Examining Ophthalmologists/Optometrists.</p>
--

<b>Candidate's Name:</b>	<b>Date:</b>
<b>Refractive Surgery Procedure Performed:</b>	<b>Date of Surgery:</b>

	Summary from Previous Assessment <sup>1</sup>	Summary from Most Recent Assessment <sup>1</sup>
<b>Date of Assessment:</b>		
Time of Day: <sup>2</sup>		
Uncorrected Visual Acuties		
Right Eye:		
Left Eye:		
Best Corrected Visual Acuties		
Right Eye:		
Left Eye:		
Subjective Refraction (Sphere and cylinder)		
Right Eye:		
Left Eye:		
Current Medication Related to the Surgery:		

<sup>1</sup>These examinations must be at least 21 days apart.

<sup>2</sup>If the candidate has undergone radial keratotomy, then the two assessments must be at different times of the day. These times should be at least 8 hours apart.

	<b>Address:</b>
<b>Signature</b>	
<b>Ophthalmologist/Optometrists Name (Please print)</b>

**Police Recruit Selection Standards  
Night Vision Testing Summary**

For either corneal refractive surgical procedures or Phakic Intra-Ocular lens implants

**Candidate's Name:** \_\_\_\_\_

**Date of Assessment:** \_\_\_\_\_

Test <sup>1</sup>	Visual Acuity	Pass/Fail
Room Illumination Bailey-Lovie Low Contrast Acuity Minimum requirement is at least 0.20 logMAR		
High Contrast Bailey-Lovie Acuity with Filters (after 5 min of adaptation) <sup>2</sup> Minimum requirement is at least 0.30 logMAR		
Low Contrast Bailey-Lovie Acuity with Filters (after 5 min of adaptation) <sup>2</sup> Minimum requirement is at least 0.58 logMAR		

<sup>1</sup>All testing should be done binocularly

<sup>2</sup>The dark adaptation period is with the filters on. The candidate is required to dark adapt only once for the low luminance testing sequence

**In order to meet the night vision standard, the candidate must pass two of the three tests.**

**OVERALL RESULT**

**PASS:** \_\_\_\_\_ **FAIL:** \_\_\_\_\_

	<b>Address:</b>

<p><b>Police Recruit Selection Standards</b></p> <p><b>Pseudophakic Intra-Ocular Lens Surgery Summary</b></p> <p><i>Night Vision Testing is also required. See Appendix 1 of the Guidelines for Examining Ophthalmologists/Optometrists.</i></p>
--

<b>Candidate's Name:</b>	<b>Date:</b>
<b>Type of intra-ocular lens:</b>	<b>Date of Surgery:</b>

<b>Summary from Most Recent Assessment</b>
--

<b>Date of Assessment:</b>			
<b>Uncorrected Visual Acuities</b>	<b>Right Eye:</b>		<b>Left Eye:</b>
<b>Best Corrected Visual Acuities</b>	<b>Right Eye:</b>		<b>Left Eye:</b>
<b>Subjective Refraction (Sphere and cylinder)</b>	<b>Right Eye:</b>		<b>Left Eye:</b>
<b>Is the candidate strabismus or likely to experience double vision?</b>	<input type="checkbox"/> <b>NO</b> <input type="checkbox"/> <b>YES</b> (please elaborate)		

If the surgery was a clear lens extraction, was prophylactic laser surgery performed?

**YES                      NO                      N/A**

In your opinion has the candidate recovered sufficiently from the surgery in order to participate in strenuous activities? For example, dragging a 45 kg weight for 10 metres, lifting 30kg, running at high speed for 100 metres, climbing over fences or other obstacles, jumping over low obstacles.

**YES                      NO**

**Police Recruit Selection Standards**  
**Summary for Artisan Phakic Intra-ocular Lens Implant**  
 Night Vision Testing is also required.  
 See Appendix 1 of the Guidelines for Examining Ophthalmologists/Optometrists

<b>Candidate's Name:</b>	<b>Date:</b>
<b>Date of Surgery:</b>	

	3 Month Post Operative Assessment	6 Month Post Operative Assessment
<b>Date of Assessment:</b>		
<b>Uncorrected Visual Acuities<sup>1</sup></b>		
<b>Right Eye:</b>		
<b>Left Eye:</b>		
<b>Best Corrected Visual Acuities</b>		
<b>Right Eye:</b>		
<b>Left Eye:</b>		
<b>Subjective Refraction<sup>1,2</sup></b> (Sphere and cylinder)		
<b>Right Eye:</b>		
<b>Left Eye:</b>		
<b>Appearance of crystalline lens</b>		
<b>Right Eye:</b>		
<b>Left Eye:</b>		

<sup>1</sup>Visual acuities and refractive errors between 3 and 6 months post-operative must be stable. Acuities are considered as being stable if the values are within  $\pm 3$  letters of each other at each visit. The refractive results are stable if the spherical component for each eye is within  $\pm 0.50$  dioptre and the cylindrical component is also within  $\pm 0.50$  dioptre for each eye for the two assessments.

**Date that any lens opacities/vacuoles/cataracts were first noted<sup>2</sup>:** \_\_\_\_\_

<sup>2</sup>If there are any lens opacities present within the first 6 months post operative or the refractive error has not been stable for at least 3 months, then the waiting period will be extended. Please consult *Appendix 3* for more details.
